PROFESSIONAL SUMMARY

Professional with 4+ years of experience supporting ERP and TMS systems, with direct involvement in functional testing, scenario reproduction, log analysis, and validation of fixes delivered by the development team. Transitioning into Quality Assurance, with hands-on practice in bug documentation and test evidence. Computer Science student with a web development foundation (JavaScript, React) that supports the technical understanding of the product under test.

PROFESSIONAL EXPERIENCE

N1 Support Analyst / Functional QA — Atua Sistemas by Nstech

2025 – Present

- Execution of functional tests and validation of fixes delivered by the development team before release to clients.
- Reproduction of scenarios reported by TMS/ERP clients to identify root cause and produce detailed evidence.
- Log analysis for incident diagnosis and support in bug investigation in production environments.
- Bug documentation with reproduction steps and structured escalation to the technical team.

N1 Support Analyst — Elevor Software

2025

- Structured bug logging and reporting for ERP system clients, including reproduction steps and evidence.
- Escalation of critical issues to the technical team, contributing to in-sprint prioritization and resolution.

Technical Support — Atual Imobiliária

2021 – 2024

- Diagnosis and resolution of technical issues in corporate environments (network, email, remote access).
- Software and OS installation and updates, with post-change validation.

Technical Support & Implementation — Z&M Software

2020 – 2021

- ERP system implementation for small and medium-sized businesses, with post-deploy functional validation.
- System parameterization based on each client's profile, with verification of key features after configuration.

EDUCATION

B.Sc. in Computer Science — ATITUS Educação

2024 – 2027 (in progress)
